

Eliminate sodium completely for good health.

Sodium is an essential nutrient that controls blood pressure and is needed to make nerves and muscles work properly, but you need the right amount.

Sea salt has less sodium than

I usually don't salt my food, so I don't eat too much sodium.

About 71% of sodium Americans consume is estimated to come from processed and restaurant foods – not the saltshaker.

That's why it's so important to compare Nutrition Facts labels and serving sizes.

My blood pressure is normal, so I don't need to worry about how much sodium I eat.

The American Heart Association recommends no more than **2,300 mg (mg) a day** and moving toward a limit of no more than 1,500 mg per day for most adults. Even cutting back by 1,000 mg a day can help improve your blood pressure and heart health.

I don't eat a lot of salty food so I don't eat too much sodium.

Sodium is found in **almost all foods** including mixed dishes such as sandwiches, burgers, and tacos; rice, pasta, and grain dishes; pizza; meat, poultry, and seafood dishes; and soups. Use the Nutrition Facts label to choose foods with the least sodium.
